## PROBIOTICS

### Benefits:

Improves overall health & Energy  
 Helps digestion & optimizes the immune system  
 Absorbs proteins, vitamins and minerals  
 Prevents some candida overgrowth  
 Improves muscle development

70-80% of your immune system is in your gut. Your gut is the engine that powers and boosts your overall health. Probiotics is the fuel that helps your gut function properly. Probiotics are essential in every person's body in order to live a healthy lifestyle.

## FULVIC ACID

### Benefits:

Increase Energy with Powerful Antioxidants  
 Boost Natural Functions & Defenses  
 Balance Hormones  
 Restore Electrochemical Balance & Boost Enzyme Production  
 Rebuild Immune System  
 Increase Oxygen Absorption

### Helps With:

Converting Sugars to Energy  
 Natural Electrolyte  
 Great for Weight Loss

The power of fulvic lies in the reactions it enables in the body. Fulvic minerals spread through the system correcting imbalances, metabolizing nutrients into their own structure, restoring proper function process, and recharging electrical potential of cells.

Fulvic minerals do most of their work INSIDE the cells. Fulvic minerals make the cell membranes more permeable before transporting the nutrients directly into the depths of the cells. The benefit is that the cells are getting a higher number of nutrients delivered to them.

Fulvic minerals are essential in supercharging the nutrients in your food. They aid the body in building a strong immune system. Fulvic minerals attach to any foreign substance or toxin and transforms them into useful substances or removes them from the body.

## HUMIC ACID

### Benefits:

Enhanced Healing  
 Boost Immune System  
 Oxygenating and Alkalizing the Body  
 Detoxification (Chlorine/Hvy. Metals)

### Helps with:

Reduce Inflammation  
 Digestive Tract Disorders  
 Minimize Allergic Reactions

These minerals are the powerhouse of all minerals. Humic minerals protect the body's cells from toxins entering the system, accelerating healing processes, and disrupting oxidative stress. They remove toxins in the gut before they ever enter the cells, allowing the immune system to function at its peak performance.

Humic minerals do their primary work OUTSIDE the cells by preventing viruses from binding to cells. Hence, it may help in reducing inflammation, and it may help fight malignant cell growth.

Humic minerals go to work in the stomach processing foods and attacking foreign invaders and toxins. By attacking these cells, the immune system is relieved of dealing with them, and is allowed to optimally perform against allergens, germs, bacteria, and other hazards. The structural complexity of Humic minerals makes it one of the most powerful detoxifying agents known to mankind.
